# "KLEIN TRANSPORTATION MAKES EXCITING NEW ADDITIONS TO ITS FLEET"

**Release Date: October 2<sup>nd</sup>, 2011 @ 11:00am**

There is always a flurry of activity about the offices and shop of Klein Transportation when new vehicles arrive. Although Klein has continually updated its fleet throughout its 54 year history, the newest arrivals include some technological wonders that make bus travel quick, easy, comfortable, and environmentally friendly.

The first new arrivals are two deluxe MCI J4500 motorcoaches. These beautiful vehicles can accommodate 54 passengers in the utmost comfort and offer WIFI (by request) as well as 110 – volt "plug-and-play" outlets. This makes using and charging your laptop or smartphone a snap! Passengers will love the reclining individual seats, individual climate control and large, flat, LCD screens which play DVD's and VHS. The coaches also feature clean-diesel engine technology for lower emissions as mandated by the EPA, and Electronic Stability Control.

Also new to the Klein Transportation fleet are air conditioned school buses. The 2011 International Corporation school buses represent the cutting edge in transportation technology but can be offered at a lower price than a motorcoach. Air conditioning makes the experience of riding in a school bus much more pleasurable. The new school buses also incorporate luggage bays on each side for easy storage, and public address systems.

Call now to reserve a Klein Transportation vehicle. Their knowledgeable sales staff will be able to explain each vehicle feature and make sure you choose the vehicle that is right for your group!
